SHED-IT™ A revolutionary new ejector system. Join the revolution.

▶ More productivity

▶ More press strokes without failure

▶ More profits

Be successful. Switch to the Shed-It.

Failed ejectors. Short production runs. And dies that need constant repair. For years, the tool and die industry has had to face these challenges on a daily basis. But now there's no longer a need to tolerate these ejector failures. Now you can eliminate them. With the Shed-It, a revolutionary new ejector system, you'll have more productivity, more reliability, more press strokes without failure and more of what you really want. Profits.

The SHED-IT™

A new ejector system that eliminates problems and generates profits.

- **Less downtime and more productivity** – Virtually eliminates ejector failures and die damage, so you don't lose press time and production runs are longer.
- **Faster press speeds and higher profits** – Increased press speeds and fewer set ups lead to longer production runs and higher profits.
- **100,000,000 press strokes. Zero failures.** – After three years of development and two years in production, the Shed-It has proven to be the most reliable ejector system on the market.
- **Long-lasting ejector systems and hard-wearing components** – More resilient than springs exceptional flex fatigue characteristics make for a longer ejector life.
